

corporate responsibility review

Corporate Responsibility is a growing strategic policy initiative for businesses that are committed to aligning their operations and strategies with widely accepted principles in the areas of human rights, labour, environment and anti-corruption. In particular businesses see the longer term benefits in demonstrating this commitment.

The principles are supported by a number of global agencies such as the United Nations Global Compact. Reporting tools such the Global Reporting Initiative framework (GRI) are increasingly being adopted by businesses to demonstrate their adherence to these principles.

PSI Asia Pacific will utilise its proven performance evaluation methodologies to assess the extent to which an organisation complies with corporate responsibility principles, and to determine the steps need to be taken to ensure that any shortcomings are properly addressed.

PSI Asia Pacific will review or assist in the development of your corporate responsibility policy model to ensure that it is:

- relevant to your corporate business environment;
- adequately resourced, properly documented and comprehensively implemented;
- understood and embraced by staff;
- recognised and approved by business stakeholders;
- cost-effective and efficient in operation; and
- reflective of the organisation's ethos.

PSI Asia Pacific's methodologies will ensure that performance indicators are developed which can be used to measure the success of your corporate responsibility policies and initiatives over time. Our solutions are customised to support our client's desired outcomes and to avoid the dangers of a one size fits all approach.

solution implementation

cost models and financial analysis

policy development and presentation

PSI Asia Pacific’s ‘first principles’ approach will define for our clients:

- the required minimum governance framework;
- the optimum management tools and methods;
- outcomes based governance processes that maximise team efficiency; and
- measurement techniques that allow for the continual improvement of performance.

PSI Asia Pacific ensures the client’s experience and knowledge is incorporated in the development of corporate responsibility policies and practices, to ensure they accurately reflect corporate goals and the realities of the client’s corporate business environment. We recognise that most organisations already pursue corporate responsibility, and in many cases may simply need to re-assess the way their commitment is presented to stakeholders in order to gain the maximum value from their existing strategies.

PSI Asia Pacific’s approach is to design a policy structure which proposes achievable and meaningful goals. The structure facilitates not only the implementation of the policies in the most efficient manner, but also the presentation of the policy outcomes to external stakeholders, inspiring public confidence in the corporate commitment to socially responsible goals which are in tune with public expectations.

PSI Asia Pacific will:

- educate executive levels of management in the benefits of corporate responsibility;
- encourage the full understanding of the relevance of corporate responsibility to your business environment;
- identify areas of policy strength and build on those strengths to enhance their value;
- identify areas of policy weakness and ensure measures are put in place to address these;
- provide experience in the identification of policy performance management;
- provide training and facilitation in the design, development and implementation of corporate responsibility policies;
- offer research and benchmarking capabilities to ensure continual improvement in corporate responsibility; and
- provide ongoing measurement and assessment of policy relevance as the broader policy environment continues to develop.
