SupplierSelect

PSI Asia Pacific is the sole distributor of SupplierSelect eRFx software for government clients across the Australasian region.

SupplierSelect is a Software as a Service (SaaS) procurement management system for: Request for Proposal (RFP); Request for Tender (RFT); panel establishment and management; and vendor evaluation projects. SupplierSelect eRFx software manages the entire procurement process in a single, integrated, multi-user web application. With no software to install, you can start using SupplierSelect today.

- Build your RFP online. Define evaluation criteria, weightings, and attach supporting files. Import RFP questions from spreadsheets, or contact PSI Asia Pacific for help with importing from other formats.
- Pick suppliers from your private address book, or invite by email.
- Publish public projects announcements through SupplierSelect or a third party service.
- Potential suppliers input their responses online, answering questions in the RFP questionnaire, and uploading supporting documents.
- Manage vendor or supplier enquiries via SupplierSelect's in-built message board.
- Weighted score totals are calculated for each supplier. Drill down via sections. Compare different weighting sets.
- In-built charts provide rapid insight into results, or export data to a spreadsheet for further analysis. Select a single and preferred supplier or create a shortlist. Optionally, provide feedback to unsuccessful vendors.
